Objective

Aspiring AI/ML Engineer with a strong interest in Python, Machine Learning, and Data Science, seeking an opportunity to apply technical knowledge to real-world problems. Passionate about learning, building practical solutions, and continuously improving technical and problem-solving skills.

Experience

- ARTIFICIAL PENETRATION sSOFTWARE SOLUTIONS PVT. LTD.** May-21-2026 - July-03-2026
AI Engineer Intern
Worked as an AI Engineer Intern in an on-site internship, gaining practical experience in Artificial Intelligence and Machine Learning. Applied machine learning concepts to real-world datasets, including data preprocessing, exploratory data analysis, feature engineering, model development, and performance evaluation. Gained hands-on experience in building and evaluating machine learning models and understanding data-driven solutions for practical business problems..
- Future Interns** 12- August -2026 - 10-September-2026
Machine Learning Intern
Completed a remote Machine Learning Internship at Future Interns, gaining practical experience through structured, task-based assignments. Applied machine learning concepts to practical problems and strengthened skills in data preprocessing, model development, analysis, problem-solving, and delivering assigned tasks within timelines.

Education

- Sri vasavi engineering college** 2024-2028
Btech
7.8
- Trimula junior college** 2022-2024
Intermediate
912
- Dr.KKR Gowtham school** 2022
School
503

Skills

- Python ,C programming language, Natural Language processing,HTML,JAVA(BASIC),PANDAS

Projects

- Loan Approval Prediction**
Developed a machine learning model to predict loan approval outcomes based on applicant-related features. Performed data preprocessing, model training, evaluation, and compared multiple machine learning algorithms to identify the best-performing model.
- Multi-Store Revenue Analysis**
Developed a data analysis and visualization project to analyze sales and revenue across multiple stores. Used MySQL to organize and manage sales data and Power BI to create interactive dashboards and generate meaningful business insights.
- Hotel Room Price Prediction**
Built a machine learning project to predict hotel room prices based on relevant hotel and booking features. Performed data preprocessing, model development, and evaluation to understand the factors influencing room prices.
- Poultry Hen Booking System**

Developed a web-based booking system for poultry hen listings that allows customers to view available hens and make bookings. The system includes customer, hen listing, booking, and owner management features.

- **AI College Notes Generator**

Developed an AI-based application that helps students generate useful notes from uploaded educational documents. The application supports multiple document formats and extracts content to assist students in preparing concise study material.

- **AI Health Report Explainer**

Technologies: Python, Flask, HTML, CSS, PDF/Text Extraction

Developed a Flask-based AI Health Report Explainer that extracts information from uploaded medical reports and presents key values, medicines, and summaries in simple language through a user-friendly web interface.

Achievements & Awards

- Introduction to Machine Learning: Art of the Possible – AWS Training & Certification Completed foundational learning in machine learning concepts, applications, and the potential of ML in real-world scenarios.
- Essentials of Prompt Engineering – AWS Training & Certification Learned fundamentals of prompt engineering and techniques for creating effective prompts for generative AI applications.
- YUVA AI for ALL – IndiaAI / Coursera Gained foundational understanding of Artificial Intelligence, its applications, and responsible use of AI technologies.
- BCG X Data Science Job Simulation – Forage Completed practical data science tasks involving data analysis, data cleaning, feature engineering, modelling, evaluation, and deriving insights.
- Tata GenAI Powered Data Analytics Job Simulation – Forage Worked through practical tasks involving exploratory data analysis, AI-assisted analysis, business reporting, and data-driven recommendations.
- Deloitte Data Analytics Job Simulation – Forage Completed practical tasks involving data analysis and forensic technology concepts while working with business-oriented data problems.
- Introduction to Cybersecurity – Cisco Networking Academy Learned fundamental cybersecurity concepts, common security threats, and basic approaches to protecting digital systems and information
- Mastercard Cybersecurity Job Simulation – Forage Completed practical cybersecurity tasks involving phishing simulation analysis and interpreting security-related results.
- Internet of Things (IoT) – NPTEL Gained foundational knowledge of IoT concepts, connected devices, sensors, communication technologies, and real-world IoT applications.
